Store-All Logistics operate one of the largest and highest specification warehouse facilities in the country with over 600,000 sqft of warehouse space, including areas with Health Products Regulatory Authority approval.

From foodstuffs to pharmaceutical products, we look after your valuable stocks maintain them in perfect condition. Our quality control systems and unique Warehouse Management System (WMS) demonstrate our superior customer service and focus on quality.

With our narrow-aisle and drive-thru Pallet Racking, we offer a warehousing solution that is tailored to every customer's unique business needs. Our warehouses are of the highest industry standard and viewing is highly recommended at any time.

Temperature Control

Some stocks need to be stored in a Temperature controlled environment. In such cases the warehouse is temperature mapped while empty (where possible) and while full (the loading is recorded on the mapping report) to determine the temperature distribution under extremes of external temperature. The mapping is performed in summer and winter to assess worse case scenarios. The heating and cooling system is supplemented with independent fanning systems to ensure good temperature distribution. The temperature in the stores is monitored using the Hanwell system and calibrated probes are used throughout.

HPRA – Health Products Regulatory Authority

We operate over 85,000 sq ft of warehousing which is approved by the Health Products Regulatory Authority for the storage of pharmaceuticals. All of this warehousing is fitted with high-bay narrow-aisle racking, and subject to strict temperature controls, dependent on customers' requirements. A number of multi-national pharmaceutical companies currently avail of our HPRA facilities, and we have a proven track record of meeting the highest industry standards. Warehouse Management System - Online Inventory Control Our Warehouse Management System (WMS) provides an online function for warehouse operations, including physical inventory, shipping, receiving, and picking, as well as management features such as queries and reporting. Clients can run reports to determine current stock levels and stock activity and generate a range of predetermined reports (Daily, Weekly, Monthly and Yearly) as needed.

Store-All Logistics can manage as much, or as little, of the supply chain you are comfortable with. We provide single elements such as warehousing or transport as well as more sophisticated service combining numerous elements, evolving bespoke solutions.

We have the skillset, expertise and willingness to mix and match and ale up or down our range of services to best suit the needs of all customers, large or small

With world economies, technology and business principals developing and changing so rapidly the dynamics of the marketplace are vastly different to what they were 5 to 10 years ago.

With this ever-changing climate businesses that are to remain successful are those that are nimble, flexible, proactive and able to adapt to the external factors that are all the time 'shifting the goalposts' or 'moving your cheese'. Smart businesses have recognised in recent times that their supply chains are often overcomplicated, overloaded and cumbersome and have found that targeting this area for lean improvements helps them to significantly reduce waste, inefficiencies and cost.

An efficient supply chain can dramatically change the face of how you do business, from Supplier Hubbing and Just In Time (JIT) deliveries negating the requirement for running your own warehouse and thus freeing up this warehouse space and dedicated staff to be better utilised in core activities to drop-shipping products for internet sales, where you no longer need to touch the product you are selling at all, the evidence is overwhelming that the 'supply-chain revolution' (first coined here) is fast becoming this centuries industrial revolution. Join in the revolution and don't get left behind. Check out our Case Studies that demonstrate how we've managed to assist our customers to improve their supply chains in order to keep ahead of the competition

You can also be rest assured that we ourselves practice what we preach, we're sure that any of our long-standing customers will agree that our business, our standards and the services we offer are vastly different to what they were 5 to 10 years ago

Whether you are operating a manufacturing, distribution or e-commerce business, Store-All Logistics can provide you with a tailored storage, order fulfilment and logistics solution. We have established cost-effective and reliable solutions to handle your orders in an accurate and timely fashion. We strive to come an extension of your business, while maintaining the level of service and quality that you and your customers expect. The nature of order fulfilment contracts means that the central distribution hub can be located anywhere in the country, particularly with our nationwide distribution arrangements.

Pick & Pack

At our secure warehouse facility, we offer 'Pick & Pack' fulfilment services ideal for organisations needing flexible, cost effective storage and distribution solutions. Store-All Logistics offers a range of distribution channels including:

24 hour (next day) Pallet/Parcel Delivery throughout Ireland,
48 hour Pallet/Parcel Distribution throughout the United Kingdom and contract distribution Internationally. Electronic track, trace and proof of deliveries are provided.

E-Commerce

Store-All Logistics offers complete e-fulfilment services to many types of ecommerce businesses, from large organisations to smaller start-ups. We can provide all the components of a highly functional online store, enabling you to get up and selling fast. If you are thinking of selling online or expanding your existing online presence then talk to us now about how we can help you succeed.

Integrated Supply Solutions

We provide tailored integrated supply solutions. These solutions enable our clients to increase their working capital by reducing inventories, supported by better control and visibility of their supply base. Our experienced management team incorporates leading edge operational practices and the latest technology to produce integrated supply solutions to the highest standards.

TRANSPORT

Our transport fleet is an integral part of the logistics service we provide our customers. Our fleet is completely flexible so that our customers who need full or part loads are facilitated. Our trailer fleet is made up of: flat and box trailers, single and double deck curtain-siders, box and curtain-siders supported by tail lifts, skelly trailers. We ensure that our drivers are professional, competent, diligent and friendly. We are members of the Irish Road Haulage Association (IRHA) and we meet all of the necessary insurance requirements and comply with transport regulations as they apply today.

24 Hour Distribution

We are a member of The Pallet Network (TPN), which operates a nationwide next day pallet and parcel delivery service. We are one of 23 members within the network, all of whom are strategically located throughout the country. Goods are trunked from the various depots to the sorting facility in Blanchardstown, Co Dublin, where the network has the capacity to handle up to 5000 pallets per night. We were pleased to have been recently rated within the top five TPN service providers, based on data collated from the entire network membership.

Haulage

As a logistics provider, haulage is one of the primary and essential services offered to our valued customers. We operate a well maintained and modern fleet which is fitted with mobile phone and satellite tracking systems. We endeavor to supply whatever type of goods transport or associated service the customer requires and we are prepared to modify and supply trailers to meet specific needs. As members of the Irish Road Haulage Association (IRHA), we comply with all RTA legislation and we carry a level of insurance cover to satisfy the needs of both National and International freight haulage.

Freight Forwarding

As freight forwarders, we are the agent that organises the international transportation of goods by land, sea and air. With our head office strategically located at Belview Port, otherwise known as the Port of Waterford, we are ideally situated to manage the movement and storage of raw materials and finished inventory.

We are committed to working in partnership with all our customers and, by strengthening these relationships, we can bring them efficiencies of administration and time, and ultimately reduced costs.
